Summary

Marital Status: Married

Gender: Male

Professional Summary

Experienced Java developer with a demonstrated history of working in the information technology and services industry. Skilled in Python (Programming Language), Microsoft Word, Jerseys, PHP, and Hibernate. Strong engineering professional with a Bachelors in Information Management focused in Information Technology from National college of computer studies.

Experience

Java Software Engineer

Aricalot Technology

Oct 2021 - Present (11 months +)

Pacesetter

• US base application for calculating and maintaining taxation process

• Develop APIs, integrate third-party payment gateway (Stripe, Authorize), integrate Accounting application

(Quickbook)

• Technology used: Jersey, PostgreSQL

Java Software Engineer

Batas Technology

Sep 2020 - Aug 2021 (1 year)

Application to match service provider and service seeker

• Develop APIs and services

• Technology used: Jersey, MySQL

Kisan

• Application to provide farmers facility to sell their products to best bidding buyers. The application aims to

remove middlemen and increase profits for farmers.

• Develop APIs and services

Java Software Engineer

Treeleaf Technologies

Jan 2019 - May 2020 (1 year 5 months)

Savx

• Blockchain base wallet for money transfer, forex, payments

• Developed APIs and Microservices

• Technology used: JxRs (Jersey), GO Lang, Protobuff, GRPC, MySQL, Redis

RCCS

- Application to fetch data from RCCS cancer patients' data.
- Devel • oped APIs to fetch data
- Technology used: Jersey, Protobuff, MySQL

Simple School
- Application to monitor students' meals for schools.
- Design database, developed APIs and services
- Technology used: Jersey, Protobuff, MySQL

JELP
- Application for requesting help from nearby people in emergency
- Design database, developed APIs and services
- Technology used: Jersey, Protobuff, MySQL

Treeleaf Website
- Design changes, Content changes
- Technology used: Html, CSS

Brilltech Website
- Design changes, Content changes
- Technology used: Html, CSS

Suchi
- Application to maintain inventory and credit system for small vendors
- Database design, develop APIs and services
- Technology used: Play, MySQL, Protobuff

Anydone
- Application for matching service providers and service seekers using AI
- Database design, development APIs, and services
- Technology used: Play, MySQL, Protobuff

Java Software Engineer
HARATI Software
Oct 2018 - Dec 2018 (3 months)
Was involved in the development of branch-less banking application
- Was assigned role to develop API
- Technology used: Spring boot, MySQL

Java Software Engineer
ITGlance
Aug 2017 - Sep 2018 (1 year 2 months)
Was involved in designing a Database and setting up projects for the restaurant management system.
- Was involved in US based project called "On Target", an application that helped in project management,
visualizing project progress, map 3D module of engineering projects.
- Was assigned the task to develop APIs, integrate APIs to import data from the similar applications (Procore)
- Technology used: Spring boot, PostgreSQL

Intern
ITGlance
Jun 2017 - Aug 2018 (1 year 3 months)

• Learning and Implementing Spring Boot project
• Involve in a project "Pharmalink", which aims to maintain medicine levels in different medical shops
• Was assigned as a team leader of the intern group which consists of two backend developers including me and
two frontend developer.
• Was involved in integrating API with Angular.
• Technology used: Spring boot, MySQL

Education

National College of Computer Studies
Bachelors, Information Management
2013 - 2017

National College of Computer Studies
Intermidate
2011 - 2013

Whitefield Higher Secondary School
School Leaving Certificate
1997 - 2011

Skills

api • artificial intelligence • Java • Spring Framework • Play Framework • gRPC • Jenkins • Docker Swarm • MySQL • PostgreSQL
